Profile

With over 15 years of software development experience, I specialize in systems design and mobile platforms. At PicPay, I lead Platform Engineering initiatives to enhance the scalability of the mobile stack across iOS, Android, and React Native. My contributions include architecting a Go-based microservice to streamline mobile observability signals into OpenTelemetry Protocol and designing a low-code platform that enables non-engineers to deploy mobile updates on demand. My work at PicPay has focused on creating innovative solutions such as a unified React Native platform for native module access and authoring technical RFCs to optimize mobile productivity and observability. I am committed to driving advancements in mobile scalability and fostering collaborative development to empower teams and deliver impactful business solutions.

Experience

Principal Software Engineer

Oct 2021 - Present

PicPay • São Paulo, Brazil

Lead the Platform Engineering initiatives that make PicPay's mobile stack scalable across iOS, Android and React Native.

- Architected and deployed a Go-based microservice that converts mobile observability signals (logs, traces, and metrics) into OpenTelemetry Protocol, cutting cross-team troubleshooting time across the organization
- Engineered a Low-Code platform that lets non-engineers deploy mobile feature updates, reducing time-to-market for new business initiatives from release-bound cycles to on-demand shipping
- Created a React Native platform solution adopted across product squads, unifying native module access between iOS and Android
- Wrote and shipped RFCs on mobile productivity and observability that became the org-wide reference for mobile apps development
- Led cross-functional task forces on mobile delivery bottlenecks and mentored senior engineers on architecture and career growth
- Advised business units on cross-platform architecture decisions spanning iOS, Android, and React Native

Software Engineer

Mar 2019 - Oct 2021

Uber • Greater São Paulo Area

Designed and scaled the Safety Media Platform's audio recording framework on the Safety team, a critical global safety feature for millions of riders and drivers.

- Designed and shipped the Safety Media Platform's audio recording framework in Swift and AVFoundation, handling peak global load for millions of riders and drivers
- Built the reusable audio framework adopted by downstream Safety audio features across the organization
- Delivered cross-stack architecture spanning Uber's entire Safety organization, ensuring high availability and robust performance under peak global loads
- Partnered with Product Managers and Designers to nail core Safety user experiences from concept to rollout
- Mentored teammates, reviewed technical design and code, and ran sessions on design patterns and testing methodologies
- Led training sessions for new hires and interviewed software engineering candidates

Software Engineer

Oct 2017 - Feb 2019

Nubank • Greater São Paulo Area

Worked on the Member Get Member (MGM) and Authorizations teams, shipping iOS features end-to-end from conception to production data analysis.

- Shipped the Virtual Card feature on the Nubank iOS app using XCTest, TDD, and Clean Architecture
- Built Member Get Member (MGM) flows on iOS from conception to production data analysis, increasing user engagement and referral conversions
- Integrated Hypermedia APIs across the iOS app and backend, ensuring resilient authorization flows

Software Engineer

Concrete Solutions • Greater São Paulo Area

Shipped iOS applications with Swift using agile management and direct customer relationships on two main projects: an e-commerce app for Carrefour grocery stores and an audio streaming app for CBN radios.

- Delivered the Carrefour grocery e-commerce iOS app in Swift with CI via Fastlane
- Built the CBN radios audio streaming iOS app in Swift, integrating REST APIs and handling audio playback at scale

Nov 2016 - Sep 2017

Software Developer

Meus Pedidos • Joinville, SC

Full-stack developer on a sales-rep solution, working across web (frontend and backend) and mobile.

- Shipped the order profitability feature end-to-end across mobile, backend, and frontend using Xamarin/C#, Django/Python, and JavaScript
- Contributed to Android and iOS app development on a shared Xamarin codebase

Jun 2015 - Oct 2016

Software Developer

Befective Brasil • Joinville Area, Brazil

Web, iOS and macOS developer programming in Ruby on Rails, Swift and CoffeeScript, with MongoDB as the primary store.

- Developed web, iOS, and macOS applications using Ruby on Rails, Swift, CoffeeScript, and MongoDB
- Built a productivity measurement solution for macOS based on machine usage patterns

Jan 2013 - Mar 2015

Manager

Choperia Capim Teimoso • Joinville, Santa Catarina, Brasil

Ran all departments of a Brazilian bar: promotions, music events, publicity, social media, bar, kitchen. A hands-on lesson in communication and small business.

- Managed all business operations including promotions, music events, social media, and staff operations, enhancing team communication skills

Dec 2009 - Nov 2012

Software Developer

Euax Gestão de Projetos • Joinville, Santa Catarina, Brasil

First professional contact with Ruby on Rails at a Scrum consultancy, contributing to two web apps: a social network for events (twygo.com) and a collaborative network for project management (artia.com).

- Developed web applications using Ruby on Rails, MySQL, Git, and Scrum methodologies, contributing to products such as twygo.com and artia.com

Feb 2011 - Feb 2012

Software Developer

Neomind • Joinville, Santa Catarina, Brasil

First software developer job, building a Business Intelligence feature for an online document management product used by governments and large companies.

- Engineered Business Intelligence features for an online document management system using Java, MySQL, SVN, and ActionScript

Oct 2009 - Jun 2010

Technical Software Support

TOTVS • Joinville, Santa Catarina, Brasil

Technical support on Datasul EMS, WebDESK and ByYou. A formative role where I worked on communication and confidence after starting out shy. Datasul was purchased by TOTVS in 2008.

- Provided technical support for Datasul EMS technology modules, WebDESK, and ByYou platforms

Sep 2007 - Sep 2009

Education

Bachelor's degree in Computer and Information Systems Security/Information Assurance

Universidade da Região de Joinville

2007 - 2011

References

Glauco Moraes

"Complete professional in all segments. Ronan, manages to have a vast knowledge of software development, without creating major complications. It is results-oriented, in addition to always disseminating knowledge. He is really a very complete professional who can work in any type of company and with the most diverse scopes, always delivering value to the product and to the company."

Rafael César Neves

"I had two opportunities to work with Ronan, totaling more than two years working together. These experiences greatly enriched our professional development. Ronan is excellent at what he does, always looking to collaborate with the team and pursue new challenges, which makes him a highly proactive and versatile professional. He is the kind of professional who fully commits to a project and sees it through to the end. Without a doubt, he is one of the professionals I admire most."

Fabiano Sakae Ribeiro

"Ronan is deeply committed to learning, creative, engaged, and proactive. He stood out among his classmates by delivering excellent academic projects and an outstanding final graduation project. He was always committed to staying up to date and consistently sought to learn both inside and outside the classroom. Whenever we worked together on assignments, we achieved great success."

Thiago A. Klein

"Ronan was an excellent classmate, always thinking about the best way to complete a task. He has strong programming skills, particularly in agile development and emerging technologies."
